

Price list of Fly fishing rod

<http://www.flyfishingsupplier.com>

Toray Carbon hand-made helical internal core With NANO+ resin from the sample workshop

The best fly rod made in China, not like the rod factories in Weihai who make all kind of rods for big quantity. We establish our factory in a small town, only make fly rod, and only make the best fly rod. We win by quality, not for quantity.

All of the fly rods in this list are made of high modulus, low resin Toray carbon fiber from Japan. The blank is with hand-made carbon helical internal core. So the blank is super light, strong and flexible, all of the rods are made in our sample making workshop which is composed of the best 15 technical workers.

The best material and best workers work out the best rod available in China. The same quality as the top three rod Korea rod factories, but with a 15-20% lower price

Sky High Gold 905-4
